

Simpler Recycling for Businesses in England

What is Simpler Recycling?

In 2024 successive governments laid plans to simplify recycling for all households, businesses and non-domestic premises in England. The Separation of Waste (England) Regulations 2024 requires all businesses with 10 or more Full-Time Equivalent (FTE) employees to segregate specific waste streams for recycling by no later than 31st March 2025.

By 31st March 2025, all businesses (except those classified as microbusinesses with less than 10 FTE employees) in England will be required to present the following materials for recycling:

**All paper &
cardboard***

**Metal
containers***

**All glass
bottles & jars**

**Food
waste***

Plastics*

***View all inclusions
and exclusions in our
*Simpler Recycling Guide***
